

Remarks

Pursuant to supplying a "remarks" page with appropriate signature, identifying "replacement sheets" and the applicants having reviewed recent USPTO correspondence dated 3/14/08 on formalities and your January 8, 2008 USPTO correspondence to me the following are some remarks:

Furthermore, prior art was identified by yourself and specifically more prior art patents has been brought to my attention for review along with your related comments.

Your comments on my original subject patent application claims were helpful and in view of the new matter of prior art information received from you and some of your comments, I have drafted new claims.

Also in your review of my patent application drawings it has been noted that some aspects of the drawings did not meet with the patent rules of 37 CFR, of which I have made some improvements in line quality, some numbers corrected and or clarified to flow with the associated specification descriptions. Some numbers on the drawings were removed to reduce the congestion on some the drawings. Also "replacement sheet" drawing pages along with specification "replacement sheet" pages have been identified.

At your convenience please call me at 772-220-8524 for a review of this patent application.

Respectfully submitted,

J. Michael Teets 4/18/08
